

Meeting Minutes – 10/25/06

- Sit with Yannis for Labrador demo
- Sit with Kurt to see his bash scripts and grading techniques
- Look at Gradesheet generator
- Grader survey questions –
 - Problems with current techniques
 - Things graders would like to see in a grading application
- **Dr. P's Interview**
 - Challenges of the current grading techniques –
 - Going back and forth to find grades and then enter them on separate Gradesheet
 - Html Gradesheet – bad format
 - Keeping track of grades and having to total it up manually

Demo:

- Grade analysis with excel – can be easily done with VSTO

Other things:

- Generate code pdf without opening vs.net
- Save grades to csv, tab delimited or some other format
- Resume with same spreadsheet for different assignments – one row for each student and one column for each assignment
- Use of factoids in recognition
