Information Assurance Scholarship Program

The Department of Defense is seeking third and fourth year undergraduate and graduate students with interests in information assurance studies. Students selected for the IASP scholarship program are awarded funding for tuition, required books, fees, labs, equipment and a stipend to cover room and board. Currently, the stipend to cover room and board expenses for undergraduates is $12,000 and for graduate students is $17,000 per academic year; disabled students may receive additional allowances. During breaks in their academic studies, IA scholars will receive progressive, hands-on experience through paid internships at select DoD organizations.

The deadline for applications is February 19, 2010.
