BS/MS in Computer Science

BS/MS Computer Science students complete both a bachelor’s degree and a master’s degree within the traditional five years. The program integrates the practical work experience of a Drexel undergraduate education with the credentials of a graduate degree.

Some of the Courses You Would Take
• Advanced Programming Tools & Techniques
• Systems Architecture
• Artificial Intelligence
• Data Structures & Algorithms
• Operating Systems
• Computer Graphics

Students can apply for the program between 90 and 120 credits. Students must have an overall GPA of 3.25 or higher and complete select core Computer Science courses with a minimum GPA of 3.50.
BS/MS Software Engineering students complete both a bachelor’s degree and a master’s degree within the traditional five years. The program provides a curriculum that encompasses behavioral, managerial, and technical aspects of software engineering.

Some of the Courses You Would Take
- Computer Networks
- Software Specification and Design
- Software Architecture I, II
- Requirements of Engineering and Management
- Software Design
- Dependable Software Systems

Students can apply for the program between 90 and 120 credits. Students must have an overall GPA of 3.25 or higher and complete select core Software Engineering courses with a minimum GPA of 3.50.
