B.S. in Computer Science

Computer scientists design and build large software systems, invent easy ways to use computing devices, ensure the security of networks, and explore the limits of what computers can do.

Some of the Courses You Would Take
- Advanced Programming Tools & Techniques
- Algorithms and Data Structures
- Computer Systems
- Software Design
- Programming Language
- Tracks

Some of the Positions You Might Hold
- Computer Programmer
- Database Analyst/Manager
- Systems Analyst
- Web Page Designer
B.S. in Software Engineering

Software engineers develop the skills needed to design, test, maintain and manage large software systems.

Some of the Courses You Would Take

- Software Engineering, I, II, III
- Software Specification and Design
- Software Architecture I, II
- Software Verification and Validation
- Economics and Accounting
- Software Project Management

Some of the Positions You Might Hold

- Software Analyst
- Software Tester
- Software Developer
- Software Manager
