2010-2011 Outstanding Computer Science Senior Design Project Competition

Tuesday, May 24, 2011 - Stein Auditorium (Nesbitt 111) - 5 to 9 p.m.

All CS and SE seniors are required to complete a three term software engineering project, in which teams of four to seven students are required to specify, design, implement, and test a substantial software project. This year there were 10 projects of which four were selected to compete in the Ninth Annual Outstanding Senior Project Competition. The four final teams win prizes ($1,000 for first, $500 for second, and $250 for 3rd and 4th) and the top two teams receive recognition on the department senior design plaque.

This year’s awards are made possible through donations from Bentley Systems, Bloomberg, CIGNA and Unisys. The winners are selected by a panel of external judges from local industry.
