TERMINALS 1i, 2j, ..., 24j
 Program input pulse terminals for programs 1-24 respectively.

TERMINALS 1α, 2α, ..., 24α
 Program output pulse terminals associated respectively with α, β, γ, δ, ε on the 24 multiplier accumulator receive switches.

TERMINALS 1β, 2β, ..., 24β
 Program output pulse terminals associated respectively with α, β, γ, δ, ε on the 24 multiplicand accumulator receive switches.

TERMINALS 1γ, 2γ, ..., 24γ
 Program output pulse terminals associated respectively with α, β, γ, δ, ε on the 24 multiplier accumulator receive switches.

TERMINALS 1δ, 2δ, ..., 24δ
 Program output pulse terminals associated respectively with α, β, γ, δ, ε on the 24 multiplicand accumulator receive switches.

TERMINALS 1ε, 2ε, ..., 24ε
 Program output pulse terminals associated respectively with α, β, γ, δ, ε on the 24 multiplier accumulator receive switches.
